

We founded smartBizNY because we're constantly reminded of the many ways a greener business can save money.

For economy and environment, the reasons to be energy efficient have never been better. We offer the guidance people need to incorporate better business practices.

We're an execution-oriented team whose professional backgrounds include sustainability consulting, LEED, small business management and environmental psychology.

BUSINESSES CUT COSTS

In a tough economy,
recapture profits
by lowering
your bills

smartBizNY.com

Welcome to the 21st century

where **energy is expensive**. If you run a business, you've noticed bills taking an increasing bite out of your bottom line.

Now is the time to save money by investing in a sensible efficiency plan. (Plus, it's good to be green.)

What if a **single investment** paid you 10%–25% back—**every month**? It's easy to see how quickly your business would recoup its initial cost. Energy efficiency programs can save a company hundreds or thousands of dollars per year.

We make it easy because as a business owner, you already have enough things to worry about. Let us do the work of making your operating costs more predictable and your employees better energy savers.

How it works:

1. Perform **energy audit**
2. Create customized money-saving **energy plan**
3. **Upgrade** facilities
4. Execute tailored **energy use policy**
5. **Evaluate** performance and cost savings

A choice you can be proud of.

Energy efficiency is the first and most important step of going green. Put your business on the road map to a sustainable future.

Smart → Green → Sustainable
